Plan of Treatment for Bed Bugs

We Request That You Stay Out of Structure After Initial Treatment For 24 Hours.

- 1. ALL laundry should be removed from chest of drawers, closets, etc and washed and dried using the hottest temperature allowed for the fabric.
2. Wash and dry ALL your bed linens and bath linens using the hottest temperature allowed for the fabric for at least 15 minutes.
3. Vacuum along rails, headboards, foot boards, bed seams, tufts, buttons, edges of the mattress and box springs,
4. Clean out from underneath ALL beds. Remove ALL clutter from your structure, which makes finding bed bugs easier.
5. Remove ALL items from cabinets, shelves, pantries, chest of drawers, closets, etc. Place in a large white or clear bag(s).
6. Remove ALL excess boxes from structure.
7. Place ALL children's toys, animal bedding, toys, etc. in a large white or clear bag(s).
8. Seal ALL perishable food items in airtight container(s) or bag(s)
9. ALL floors and carpets should be swept, mopped and vacuumed before extermination begins.
10. Remove ALL draperies and window dressings from all windows, wash and dry using the hottest temperature allowed for the fabric.
11. Remove ALL electrical outlet covers and ALL electrical light switch covers.
12. An inspection of ALL areas of structure with black-light may be performed.
13. Pest Professional may use Climb-Up Insect Interceptors which are a unique and easy-to-use monitoring system to aid in the early detection of bed bug infestations and can be placed after treatment.
14. Pest Professional may use Nuvan Pro-Strips - a product that kills bed bug in difficult to treat items such as electronics.
15. Pest Professional may use a combination of both contact and residual bed bug sprays, designed specifically to kill bed bugs.
16. Follow-up treatment in 14 days.
17. Follow-up treatment in 14 days after the first follow-up.
